

RSV in Long-Term Care Facilities:

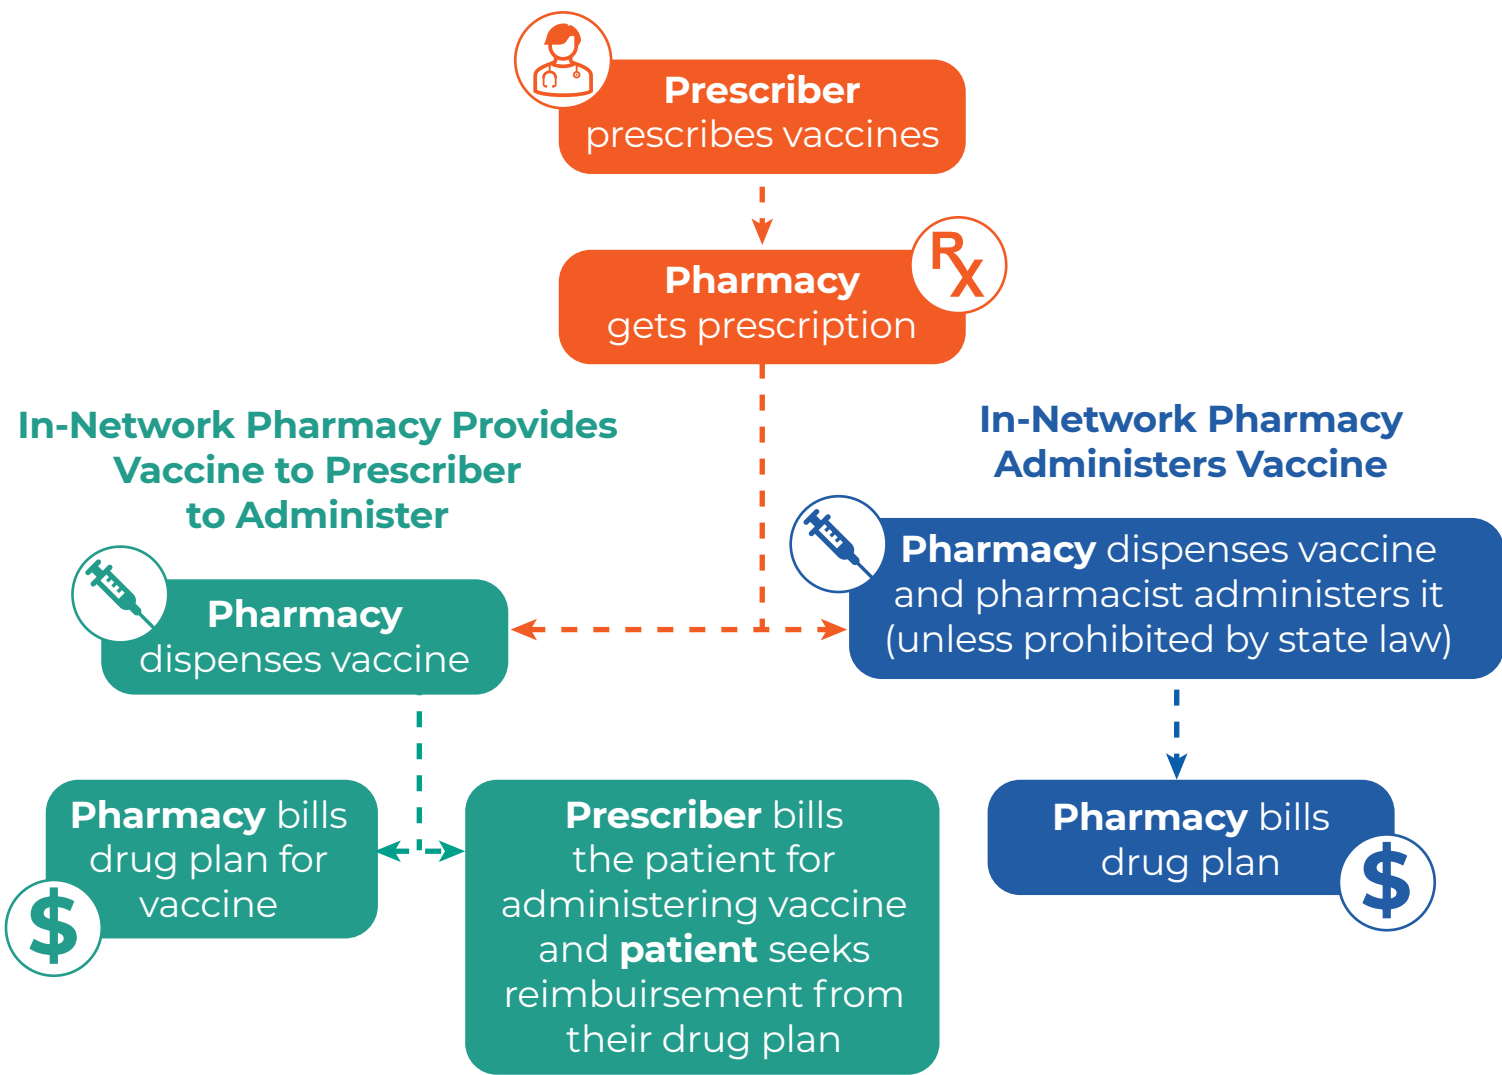

Working Together to Bill for and Administer the Vaccine

For long-term care residents, submit to Part D as usual, but for short-term care residents normally covered by Part A, ensure submission to Part D instead.

RSV vaccine is **provided** by the in-network pharmacy and **administered** by either the pharmacy or the prescriber

For out-of-network situations, prescribers can assist patients with submission of their vaccine claims to the Part D plan. The prescriber must then agree to accept the Part D plan payment as payment in full. The prescriber does not become a network provider.
